

Research Manager Intensive Training – 2:

Mastering research management

Hackathon

During RMIT-2, participants will collaboratively examine, or “hack”, a challenge of their own. This hackathon approach will allow participants to gain both an overview, and deeper insight into the state and challenges in the RM profession.

A – Context

- ✓ Trends and challenges in the RM profession.
- ✓ Exploring core competences in RM.
- ✓ Presenting participant cases and underlying patterns.
- ✓ Forming teams, designing process.
- ✓ Best practices in RM and innovative approaches to common challenges.

B – Depth

- ✓ Advanced project management techniques.
- ✓ Developing solutions; teamwork.
- ✓ Funding and grant writing.
- ✓ Leadership in RM.
- ✓ Refining and scaling solutions.
- ✓ Effective communication and stakeholder engagement.

C – Future

- ✓ Participant case study follow-up.
- ✓ Personal reflection and peer feedback
- ✓ Career development: opportunities and goals, plans and strategies.
- ✓ Discussion on trends and future directions for RM; visions, aspirations and insights.
- ✓ Course wrap-up and evaluation.

Hackathon - Part 1: Setting the stage (cases) and exploring core competencies.

Hackathon - Part 2: Exploring project management, leadership, communication, and more in depth.

Hackathon - Part 3: Reflecting and planning forward. Cases feedback, the future of RM.
